Re: Special Permit No. S-18612
F. J. Doyle Scrap Metal
Heat Cleaning Oven
Leonard, Fannin County

FB0002X

Dear Ms. Wright:

The staff of the Texas Air Control Board (TACB) has evaluated the referenced application for a permit to construct and your comments concerning the proposed facility.

Our technical evaluation confirms that emissions will comply with all Rules and Regulations of the TACB and will not cause or contribute to a violation of any National Ambient Air Quality Standard. Our evaluation also confirms that emissions will be minimized by application of the best technology available for this facility. In view of these findings and after careful consideration of the comments you submitted, my final decision is to issue the permit to construct for the proposed facility.

We sincerely appreciate your concerns and interest in air pollution control. Our staff will carefully investigate this facility to ensure that it is constructed and operated in compliance with all provisions of the permit.

Sincerely,

A handwritten signature in cursive script that reads "Eli Bell".

Allen Eli Bell
Executive Director
